

1st International Conference on Systems and Computer Science

August 29-31 2012, Villeneuve d'Ascq, France

Invited session on
Change-point Detection

Proposed by: Mamadou Mboup (Univ. Reims, F)

As part of the ICSCS conference, we are organizing an invited session about the change point detection problem. This problem is central in various applications, from process monitoring in industry (e.g. diagnosis, fault detection and isolation) to analysis of biomedical signals (e.g. detection of neural and epilepsy spikes, detection of QRS complexes).

Proposed papers are expected to present new advances in the topic, either in a theoretical, or algorithmic or in an application oriented point of view.

Authors must submit their proposal through the conference web site and select the appropriate session "Change point detection" in the EasyChair Conference Management System.

Important dates

April 6, 2012 Submission of draft papers and invited sessions
May 15, 2012 Notification of acceptance
June 15, 2012 Submission of final papers and early registration deadline
Sept. 3-5, 2012 Conference
